Andy has had over 16 years of experience in the Civil Industry and joined T & J Constructions in 2008 as the Project Supervisor for the Westwood Urban Regeneration Project in conjunction with UPL.

Andy is recognised across South Australia for his ability to manage multiple projects and being able to assess any site to ensure it is generating the maximum productivity from the plant and labour. Andy has a high level of commitment to all his projects and his position at T & J Constructions has resulted in all projects being managed with a higher degree of supervision including procedural and protocol implementation.

As the construction Manager, Andy is responsible for ensuring all projects are running smoothly and that the plant and labour are matched to each site in a way that ensures risks are managed and that the productivity targets are achieved.
